## Appendix C Introductory public meeting 16<sup>th</sup> April 2016

|   | What do we want our  | Record number of stickers / comments |
|---|--|--------------------------------------|
|   | neighbourhood plan to achieve?   | made                                 |
| 1 | Ensure that the village remains a<br>vibrant and thriving community into<br>the future. Sustainability for the long-<br>term future and what is needed for | 20<br>'should be a given'            |
| _ | this to work   |                                      |
| 2 | Give the village a voice in deciding<br>how the village might improve and<br>grow over the next 20 years   | 23                                   |
| 3 | Ensure that the hosing stock in the<br>village can meet the needs of our<br>future residents over the next 20<br>years.                                    | 19                                   |
| 4 | Influencing housing development in the village   | 4 non-specific                       |
|   |  | 24                                   |
|   | a. Identifying potential sites for   | 3                                    |
|   | housing  | 11                                   |
|   | b. Look and feel   | 13                                   |
|   | c. Housing density   |                                      |
|   | d. Housing mix   | 36                                   |
|   | e. Meet local needs – recognising the  |                                      |
|   | age profile of the village and   | 2                                    |
|   | looking at needs of young people<br>and families, and of retired people<br>who may wish to downsize  | 2                                    |
|   | f. Access  |                                      |
| 5 | g. parking<br>Using developer contributions (CIL) to<br>benefit village facilities and   | 15 'no discussion needed'            |
|   | infrastructure. Ensure that the<br>facilities in the village can meet the<br>needs of villagers over the next 20   |                                      |
|   | -  |                                      |
| 6 | years.<br>Preserve and improve amenities such  | 10 non-specific                      |
|   | as:  | 10 11011-3040110                     |
|   |  | 15                                   |
|   | a. transport   | 18                                   |
|   | b. footpaths   | 2                                    |
|   | c. cycle routes  | 7                                    |
|   |  | ,                                    |

|   | <ul><li>d. green spaces</li><li>e. sports facilities</li><li>f. playground</li></ul>   | 3<br>3   |
|---|--|--|
| 7 | Improve the environment including the environmental impact of village facilities       | 7  |
| 8 | Valuing the green belt/ surrounding countryside and ensuring we remain a small village | 38   |
| 9 | Other ideas?   | Retirement housing (11)<br>Social housing (3)<br>Low cost housing (1)<br>Use developer contributions to facilitate<br>village facilities e.g. pre-school, shop, pub<br>(1),<br>Improved connections to surrounding areas,<br>e.g. footpaths, bridges etc. Connectivity is<br>important for younger generations, and<br>safety.<br>Improved footpaths in the village.<br>Can we ensure that there will be no major<br>traffic route through the village in the<br>future (e.g. Standlake) |

These issues formed the basis for the Vision and Objectives for the first draft of the Appleton with Eaton Neighbourhood Plan.
